

INAUGURAL SPEECH BY OUR STATE PRESIDENT

Inaugural Speech by the President of Syno Aurelius, His Excellence Dr. Monja Roindelo Zafitsimivalo upon the Official Proclamation of Syno Aurelius.

Syno Aurelius was proclaimed today as an Independent Autonomous Sovereign Country with its Constitution, its Parliament, its National Symbols and its State Organs.

Our People today exercised their right to belong to a Country where they share common ideals and aspirations.

We live in an era of Digital Transformation and Globalization where we can connect through the internet network with someone on the other side of the world and communicate, socialize or interact by using a few buttons on a keyboard or on a handheld cellular phone. Software programs like Google, Facebook, Twitter, Instagram and LinkedIn connects us from our place, our study, our dining room our lounge and even our bedroom to socialize or do business with someone at their place.

We can surf the net to have virtual relationships. There are more than a billion people using these virtual services that opened new worlds and opportunities. We now get virtual offices from where you can operate an entire business, virtual shops that you can visit, explore and buy products, goods or services. You can register a virtual business complete with a virtual office and receive registration and incorporation documentation.

Governments, Corporations and Companies use virtual employment. There are more than 20 000 virtual jobs being advertised right now. Employment Agencies use virtual assistants to conduct interviews. Universities and Colleges offer virtual study courses to obtain degrees and diplomas. Academics, students, scholars, anyone who so wish can visit State and University libraries or bookstores and search material, read books, watch instructions.

We can watch or download movies and music or make our own movies and music and place it in this virtual world. We can attend Music Events and take part in these events.

We can play virtual games with exceptional reality and can emerge into virtual reality and extended reality where you can actually feel and touch and experience everything.

We can visit Towns, Cities and Countries. We can learn about them, and we can revisit them.

We experience a revolution with Digital Currencies, with which you can trade with or invest or buy goods or assets with. These virtual currencies are recognized by Governments and Banks and Financial Institutions.

Countries now offer virtual residency and virtual passports. You can become a Citizen through your virtual connection.

Syno Aurelius is a virtual Country, operating as a Virtual Private Network on the World Wide Web with modern Cloud based technology. We have Citizens who are like minded, an exceptional Constitutional System and an effective Parliamentary System and Judicial Courts through which our Country is governed.

I met our Founder in the late nineties' during my search for financial alternatives and development aid for the people of Madagascar. We spend hours together which became months and years. He had this mission to assist, help and support people in general and I had the same mission specific for the people of Madagascar. We planned and structured and created Models and Innovative Ways to do it. It all culminated in the creation of a Country. An Independent, Autonomous, Free, Sovereign Country without borders for people all over who share our dreams, visions, ideals and aspirations.

We are a Sovereign State with our own Currency, our own Flag, National Anthem, Political System, our own Constitution, our own Parliament consisting of 4 different Chambers, our General Assembly, our Foreign Affairs and International Relations Department, our Courts and Justice System, our own Internal Affairs, our own Defence and Military, Intelligence, Safety and Security, our own Financial System with a Central Bank, Primary Banks and Federal Agencies, our own Company Registration Office, Broadcast Corporation and National Airlines.

Our own Government that not only comply with international requirements but surpass many Governments in effectiveness, functionality and management.

Our Executive Leader is a democratically chosen President who is elected through a free and fair democratically election. Our Symbolic and Ceremonial Leader is our Monarch, who is the genius who founded and created our Country.

The Political System is a Constitutional Monarchy following in the footsteps of great Countries such as Norway, Spain, the United Kingdom, the Netherlands, Denmark and Japan. Syno Aurelius has a superb Constitution that can compare with the best in the world, drawn up by our Founder and structured by a doctor in International Law and his team.

We do not have Political Parties as we believe that every leader must lead because of his or her ability, focus, passion and capabilities. Not a collective where there is continuous struggle and strive to lead but through genuine dedication and a shared mission to Assist, Help and Support.

Syno Aurelius is a new age Country; a modern Country whose existence is possible due to the technological developments of communication and the determination of its Citizens.

Through Syno Aurelius we can achieve good for peoples in need, for Bilateral Partners and for the Citizens of Syno Aurelius.

I give you the Constitutional Monarchy of Syno Aurelius.
